SPHAGNUM

We are a specialist in exports of Sphagnum Moss

Product of Chilean origin environmentally friendly

Sphagnum Moss

-  **Product of Chilean origin**
We make it possible for small collectors from southern Chile to go out into the world to market their work
-  **Eco-Friendly and renewable Product**
Sustainable harvest ensures resource perpetuation through adequate management.
-  **Buy insurance direct sale**
All our products are certified by the SAG in Chile and we deliver them in conditions to be exported anywhere.

Sphagnum Moss 5 Stars Quality

Sphagnum Moss, also known as "Sphagnum Magallanicus," is a vegetable moss found in wetlands across Chile. With extraordinary properties, it's utilized in orchid production, offering optimal growth conditions by retaining water passively. Harvested by hand, it absorbs 20 times its weight in water, promoting constant humidity for plant growth without saturation, thus aiding in water savings. It is beneficial for the production of various plants and flowers and various industries.

Specifications:

PH 4.8

Moisture ratio +/- 20%. / o / -

Humidity ratio +/- 20%

Foreign matter ratio > 1%

Characteristics:

Fiber length: 8 to 14 cm

Color: Light Beige

Impurities: 1 %.

FORMATS:

Medium format, 1400 bags per container approx.
(5 kilos bags) measures (30 x 30 x 45) (30 x 30 x 50) centimeters, total 7,000 kilos.

Delivery conditions

We address logistical and care concerns to ensure top-quality orders. Our certified suppliers coordinate land and sea logistics, facilitating timely delivery. Understanding the challenges faced by small producers, we offer support services to meet SII, SAG, and logistical requirements for exportation with consistent quality. With ample stock, our shipments undergo meticulous SAG-certified and phytosanitary inspections.
